

With the new **Milgo Digital Plotting System**, you output only the end points on lines up to 42" long — the plotter does the rest . . . with no deterioration of the plotter's normal dynamic accuracy. There is never a second tier subroutine to compute the length of a line! **Result:** reduced computer programming, reduced computer output time, reduced plotting time.

The **Milgo DPS-6** includes a choice of off-line readers, plus either a vertical or horizontal plotter. And the system provides for all standard

digital inputs plus straight analog. It accepts magnetic tapes recorded in either gapped, gapless or long record format. An optional core storage buffer allows up to 10,800 bits between gaps.

Send for a brochure-full of additional features on the Milgo DPS-6. Write or call **Milgo Electronic Corporation** 7620 N.W. 36th Avenue, Miami, Florida 33147. Phone 305-691-1220. TWX 305-696-4489.
